The #1 Mistake Crypto Beginners Make

Did you know that 80% of new crypto investors lose money in their first year?

It's not because crypto is a scam—it's because they make one fatal mistake:

👉 They invest without a strategy.

Most beginners jump into crypto blindly, buying random coins based on social media hype.
When the market dips, they panic-sell at a loss.

💡 How to Avoid This?

The key is understanding the game before you play. That means knowing how to research coins, track market trends, and make strategic moves.

Here's a simple 3-step framework that seasoned investors use:

- ✓ Step 1: Use technical indicators like EMA Ribbons & MACD to find strong entries and exits.
- ✓ Step 2: Follow the right timeframes—1H, 4H, and Daily charts work best for swing trading.
- ✓ Step 3: Don't chase hype—focus on long-term fundamentals & price action.
